-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Okada et al (US 4,837,757).

Regarding claim 1, see Figs. 1-4 of Okada et al which disclose an apparatus (see Fig. 1) in which a pick-up head (objective lens 8) is controlled during a long seek by carriage (10), and a force (lens damping signal) is applied on the pick-up head (lens 8) for driving the pick-up head (lens 8) to move along an accelerating direction of the carriage 10 (see Figs. 3A-3D) as recited in claim 1

Regarding claim 2, see the rejection applied to claim 1, and further see a sledge (carriage 10) is driven by using a Feed Motor Output (FMO) signal (102) as further recited in claim 2. Note: the damping signal used to drive the pickup head (objective lens 8) is the same as the driving signal 102 used to drive the sledge/carriage 10. Therefore, the pickup head (objective lens 8) is also driven to accelerate along the acceleration direction as that of the sledge/carriage 10.

Regarding claim 3, this limitation is inherently included in the apparatus of Okada et al. since a predetermined value as recited in claim 3 can be any value.

Cited References

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited references relate to an optical apparatus having a control unit for controlling a long seeking operation or high speed access operation of a pickup head, and a driving unit for applying a force to an objective to drive or accelerate the object lens in a acceleration direction in order to maintain its position during the seeking/accessing operation.
4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thang V. Tran whose telephone number is (571) 272-7595. The examiner can normally be reached on M-F 9:30AM-6:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nguyen Hoa can be reached on (571) 272-7579. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
